Subpart DD - Use of Electric Transmission and Distribution Equipment

This page provides an overview of Subpart DD reporting through e-GGRT. More detailed information regarding Subpart DD reporting can be found in the S ubpart DD Webinar.

Once you have added Subpart DD to the list of subparts you will report and have clicked on the "Open" link next to Subpart DD, you will see the following screen:

🥑 e-GGRT Help	Sokha Subpart DD: Electrical Transmission and Distribution Ed Subpart Overview	quipment Use <mark>(2013)</mark>				
	Subpart DD requires affected facilities to report total SF6 and PFC emissions (including emissions from fugitive equipment leaks, installation, servicing, equipment decommissioning and disposal, and from storage cylinders) resulting from the transmission and distribution servicing inventory and equipment listed in §98.300(a). For acquisitions of equipment containing or insulated with SF6 or PFCs, you must report emissions from the equipment after the title to the equipment is transferred to the electric power transmission or distribution entity. If you are subject to other subparts (e.g. Subpart C) you should return to the Facility Overview page, select the appropriate subpart(s), and complete the data reporting requirements of each subpart. To satisfy the Subpart DD reporting requirements you will first download the Subpart DD reporting form(s). Use the link provided to access the form(s) and find instructions for completing those forms. Next, you will upload the completed form and e-GGRT will validate the data contained within it. Use the "View Validation" link to review any issues found in your reporting form. If necessary, make any revisions necessary to your reporting form and upload the revised reporting form.					
	For additional information about Subpart DD reporting, please use the e-GGRT Help link(s) provided.	Subpart DD: View Validation

Subpart DD Reporting Form

Please see Reporting Form Instructions for information on downloading the blank reporting form and uploading the completed reporting form.

The Subpart DD Reporting Form has two tabs. Instructions for completing each of the tabs can be found on the following pages:

- Facility Level DetailsGHG-Specific Information

Completed Subpart DD Reporting Form

After you have successfully uploaded the completed Subpart DD reporting form, the upload page will be updated to reflect the file you have uploaded. Once you successfully upload, the Subpart DD upload screen will also display a summary of your emission totals by chemical at the bottom of the page, as seen below.

If you attempt to upload a file but your file is not accepted by e-GGRT it is generally because your file has a fatal flaw or is missing essential data. The reason why the file was not acceptable is displayed as a screen error on the upload page. For an example of a screen error message, see below.

During the upload, e-GGRT will generate a validation report which will list potential deficiencies or issues with your reporting form. Click on the "Subpart DD: View Validation" link to review your validation report. An explanation of the validation report and the process for correcting validation issues prior to submission is presented in Reporting Form Validation.

Once you have addressed the validation issues to the extent you believe necessary, and once you have completed any other applicable subparts, you must generate, review, certify, and submit your annual report as described in How to Submit an Annual Report.
