

Q730. What emissions are reported for petroleum and natural gas systems facilities?

Q730. What emissions are reported for petroleum and natural gas systems facilities?

A730. Facilities in petroleum and natural gas systems are required to report emissions from combustion, venting, equipment leaks, and flaring. The exact list of equipment is specified in the regulatory requirements at 40 CFR 98.232 and is specific to each petroleum and natural gas systems industry segment covered by the GHGRP.
