

Calculation Spreadsheet Archive

E-GGRT currently reflects the rules deferring reporting of inputs to emission equations for direct emitters. In August 2011, EPA deferred the reporting deadline for inputs to equations until either March 31, 2013 or March 31, 2015 to allow time to fully evaluate the potential impact from the release of this data. The inputs to equations whose reporting deadline was deferred until 2013 are listed in Table A-6 of subpart A of the GHG reporting rule. e-GGRT webforms and reporting forms have been modified to include input to equations that are no longer deferred. As a result some optional calculation spreadsheets that were use in prior reporting years have been subsumed by webforms or reporting forms and are no longer in use.

In case you would like to do these calculations yourself or double check e-GGRT's calculations we have provided an archive of obsolete calculations spreadsheets below:

Subpart	Calculation Spreadsheets (click to download)
C - Combustion	Equation C-11 Calculation Spreadsheet.xls
I - Electronics Manufacturing	Subpart I Calculation Tool for RY2013 and earlier.xlsx
	Subpart I Calculation Tool for RY2014 and RY2015.xlsx
DD - Use of Electric Transmission and Distribution Equipment	Subpart DD Calculation Spreadsheet.xls
SS - Electrical Equipment Manufacturer or Refurbishment	Equation SS-1 Calculation Spreadsheet (PFC).xls
SS - Electrical Equipment Manufacturer or Refurbishment	Equation SS-1 Calculation Spreadsheet (SF6).xls
SS - Electrical Equipment Manufacturer or Refurbishment	Equation SS-5 Calculation Spreadsheet.xls
SS - Electrical Equipment Manufacturer or Refurbishment	Equation SS-6 Calculation Spreadsheet.xls
TT - Industrial Landfills	Equation TT-3, TT-4a, TT-4b Calculation Spreadsheet.xls
