Browser-Specific Issues and Behaviors (including Finding Lost Inputs Files)

Normally, when you save a the most recent version of your IVT input file you should be prompted to save or open the file you intend to download. If you choose to save the file you will be prompted to identify a folder where the file will be placed. Often browsers are set up to skip the folder selection process and this prompt will not appear. The result is that many users don't know for certain where their IVT inputs file as saved and have difficulty retrieving them. There are a couple strategies we recommend in these cases: 1) To ensure that you are prompted to download, refer to the information below regarding browsers settings and saving processes for Mozilla Firefox, Internet Explorer, or Google Chrome browsers and 2) To locate a IVT file that has been previously saved we recommend a windows search procedure as described at the bottom of this page.

Other browsers and old versions of the listed browsers may behave differently than what is described on this page.

Changing the Save Settings or Default Save Location Used By Your Browser

MOZILLA FIREFOX

Settings

/!\

Open the browser and go to **Tools\Options\General** to either specify a consistent location (default is generally the Downloads folder) in which to save files or provide a prompt for you to specify a location.

General Tabs Content Applications Privacy Security Sync Advance Startup When Firefox starts: Show my home page Image: Content in the start in									
General Tabs Content Applications Privacy Security Sync Advance Startup									
Startup When Firefox starts: Show my home page									
When Firefox <u>s</u> tarts: Show my home page									
Home Page: Mozilla Firefox Start Page									
Use <u>Current Pages</u> Use <u>B</u> ookmark <u>R</u> estore to Default									
Downloads									
Save files to Downloads Browse									
Always ask me where to save files									
OK Cancel <u>H</u> elp									

Note that Firefox has a browser setting to provide a prompt or to designate a file location.

The following site provides additional Mozilla Firefox solutions if the above information does not resolve your issue: https://support.mozilla.org/en-US/kb /change-firefox-behavior-when-open-file

Saving Files

When you save a file using Firefox, you are prompted to Open or Save the file. After clicking SAVE, the file is automatically saved in the Downloads folder. The file will be saved using the following default structure: facility ID-facility name-reporting year.zip (e.g., 515869-Siem_Reap-2014(11).zip).

INTERNET EXPLORER (IE)

Settings

Open the browser and click **Tools\Internet Options\Security. Select Custom Level.** Scroll down to the Downloads heading and select **Enable** for automatic prompting, files, and fonts. If the file is downloaded, but there is no prompt, you likely have **File download** disabled. If no file is downloaded and you receive a security alert message, "Your current security settings to do not allow this file to be downloaded", then **Automatic prompting for file downloads** is likely disabled.

How to Find a Lost Inputs File on Your Computer

To find a lost IVT inputs file we recommend using the file search feature on your computer. If this occurs, you can search for the saved file by following the steps outlined below.

The information below is for computers that use the Microsoft Windows operating system. For information on finding files for computers that use an Apple operating system, see http://support.apple.com/en-us/ht2470

1) Open File Explorer by clicking the File Explorer icon on your taskbar.

2) In the upper right of the Explorer Window there is a Search box. The search will look in all the folders and sub folders in the current location by Kind, Date Modified, Type and Name.

Firefox and Chrome: IVT files will follow the following default structure: facility ID-facility name-reporting year (number).zip (e.g., 515869-Siem_Reap-2014 (4).zip).

IE: IVT files will follow the following default structure: facility ID-facility name-reporting year.zip (e.g., 514488-Angkor-2014.zip).

IVT will show the name of the files it is looking for as shown highlighted in red below. Use this file name in your search.

(1) You have not loaded your Inputs Verifier file!
You may not access this subpart until you have loaded your previously-saved Inputs Verifier file for this facility.
Last Saved File: 515869-Siem_Reap-2014.xml Saved By (Date): Sokha Chea (November 06, 2014 10:59 AM)
To proceed, locate the Last Saved File above with the Browse (or Choose File) field below and click LOAD.
Browse_ No file selected.
LOAD CANCEL
If you are unable to locate the Last Saved File above, or know it to be lost: You may "reset" your facility. The reset process will enable you to enter this subpart; <u>but, the reset process will remove ALL previously</u> calculated Inputs Verifier Tool results and will require you to re-enter ALL Inputs Verifier Tool equation inputs data for ALL of this facility's subparts.
RESET FACILITY

When you get your search results, look for the IVT file that matches the time and date specified by IVT. Note: the correct file name may be preceded by a number in parentheses if more than one version of the file is in the same folder.
