

Subpart S Calculation Methodology Selection

Subpart S Calculation Methodology

The first time you access the Subpart S reporting space on e-GGRT for a facility, you will be asked to select the methodology used to calculate emissions from the following options:

- Emissions NOT calculated using CEMS
- Emissions calculated using CEMS
- Emissions calculated using both CEMS and Non-CEMS

Siem Reap
Subpart S: Lime Manufacturing (2014)
Subpart Overview

OVERVIEW OF SUBPART REPORTING REQUIREMENTS
Subpart S requires affected facilities to report greenhouse gas (GHG) emissions from all lime kilns combined. Use this page to identify your facility's calculation methodology. If all lime kilns meet the conditions specified in §98.33(b)(4)(ii) or (b)(4)(iii), you must calculate and report under this subpart the combined process and combustion CO₂ emissions by operating and maintaining a Continuous Emissions Monitoring System (CEMS) to measure CO₂ emissions. For additional information about Subpart S reporting, please use the e-GGRT Help link(s) provided.

* denotes a field required to advance within e-GGRT

SUBPART S METHODOLOGY
Indicate the Facility's Methodology for calculating Emissions

☒ Emissions NOT calculated using CEMS
☐ Emissions calculated using CEMS
☒ Emissions calculated using both CEMS and Non-CEMS

START **CANCEL**
