

# Tier 2 Subpart C Streamlined Reporting

## Tier 2

For Subpart C facilities that use the Tier 2 calculation methodology, using the new Tier 2 Streamlined Reporting Tool (i.e., Tier 2 Equation Inputs Bulk Reporting) will allow for simultaneous entry of all fuel-level emissions equation inputs (i.e., fuel quantities and HHVs) and other required information across all configurations in a single Excel Worksheet (with the exception of Tier 2 Blended Fuels). If a facility has configurations and fuels that are eligible for Tier 2 Streamlined Reporting, the pop-up box shown below will appear on the Subpart C Overview Page. This feature is only applicable in Reporting Year 2019 (RY19) and forward, and is available for both fuels and configurations which are carried forward from the prior RY, and new configurations and fuels added in the current RY.

To maximize the time and effort savings available from Tier 2 Equation Inputs Bulk Reporting, users should first **ensure all of their configurations and fuels are present** in e-GGRT (either by adding them to the current RY, or as carried forward from the prior RY), and then download the Excel Worksheet. Adding the configurations and fuels in e-GGRT, without entering equation input values for Equations C-2a, C-2b and C-2c, will allow e-GGRT to provide those rows in the streamlined reporting worksheet, thus allowing reporters to use the centralized data entry available in the worksheet and eliminate the need to navigate across several traditional e-GGRT webforms.

Using e-GGRT for Subpart C reporting

**Tier 2 Streamlined Reporting Facility**

**Subpart C: General Stationary Fuel Combustion (2020)**

[Subpart C Overview](#)

**OVERVIEW OF SUBPART C REPORTING REQUIREMENTS**

Subpart C requires affected facilities to report annual carbon dioxide (CO<sub>2</sub>), methane (CH<sub>4</sub>), and nitrous oxide (N<sub>2</sub>O) emissions from each stationary combustion unit. First, use this page to identify each stationary combustion reporting *configuration* (reporting options listed in 40 CFR 98.36) and then enter fuel usage and related information required by subpart C for each configuration.

For additional information about subpart C reporting, please use the e-GGRT Help link(s) provided.

[Subpart C Overview](#) » [Tier 2 Fuel Streamlined Reporting](#)

### Tier 2 Equation Inputs Bulk Reporting

You may use this screen to bulk upload your Tier 2 equation inputs. You may use this feature more than once to enter or update your fuel data.

The downloadable form will always reflect your facility's current Tier 2 fuel data.

Inputs for fuels included in units that use IVT will not be saved by e-GGRT.

If you want to add or delete units or fuels, change equations, etc... please use the normal reporting screens. You can then return here to download a new form which will reflect those changes.

[Subpart C: View Validation](#)

#### 1.) DOWNLOAD THE FORM

Please use the link below to download the Tier 2 Equation Inputs Bulk Reporting Form. It will be prepopulated with current information from all of your facility's units and fuels that use the Tier 2 reporting methodology.

[Tier 2 Facility 525542 RY2020 Tier 2 Fuel Reporting Form](#)

#### 2.) COMPLETE THE FORM

Complete the Tier 2 Equation Inputs Bulk Reporting Form.

#### 3.) UPLOAD THE COMPLETED FORM

Find/choose your completed Tier 2 Equation Inputs Bulk Reporting Form and click UPLOAD. e-GGRT will validate and process your form.

e-GGRT 20.14-j1502 | SPC-T2download

After downloading and opening the form, users can enter all fuel-level information and equation inputs into this spreadsheet. The grey highlighted information that is pre-populated in the Microsoft Excel sheet cannot be altered in any way. If a user wishes to make alterations to the configuration or fuel information in the bulk reporting form, they should make the changes in the traditional e-GGRT webforms, and then download a new version of the Microsoft Excel form. The new form will have the updates represented in the grey cells.

Certain Copy and Paste functions can corrupt this form. To avoid this, only use the 'Paste Values (V)' option when pasting into this form

#### Tier 2 Equation Inputs Bulk Reporting

You may use this screen to perform Tier 2 Fuel Streamlined Reporting. It is an optional, alternative way to enter and/or update your Subpart C Tier 2 fuel data. It may still be necessary to use the normal reporting screens to complete your reporting.

If you need to add or delete units or fuels, edit configuration types, change your use of the Inputs Verifier Tool (IVT), or change which equation is used, please use the normal reporting screens to make those changes. You can then return here to download a new form which will reflect those changes.

[Subpart C: View Validation](#)

#### SUCCESS!

e-GGRT was able to process your Tier 2 Equation Inputs Bulk Reporting Form. A summary is shown below.

#### FUELS USING A TIER 2 CALCULATION METHODOLOGY

Unit Name/ID	Configuration Type	Equation Used	Fuel	Annual Emissions (metric tons)		
				CO <sub>2</sub>	CH <sub>4</sub>	N <sub>2</sub> O
Bark Boiler	Single Unit Using Tiers 1, 2, or 3	Equation C-2a	Natural Gas (Weighted U.S. Average)	45,246.2	0.85	0.085
Bark Boiler	Single Unit Using Tiers 1, 2, or 3	Equation C-2a	Tires	8,398.0	3.13	0.410
Bark Boiler	Single Unit Using Tiers 1, 2, or 3	Equation C-2a	Wood and Wood Residuals (dry basis)	270,489.7	20.76	10.381
Bark Boiler	Single Unit Using Tiers 1, 2, or 3	Equation C-2a	Other Biomass Gases	2,214.6	0.14	0.027
CP-Extruders	Common Pipe	Equation C-2a	Natural Gas (Weighted U.S. Average)	93,446.4	1.76	0.176

**Finished**

Any remaining information that is required to be reported for eligible configurations, or any configuration that does not use the Tier 2 Equation Inputs Bulk Reporting Form, will still need to be completed using the traditional e-GGRT webforms before the Subpart C reporting is complete.
