

Subpart W XML Reporting Help for RY2019

XML Reporting Documentation

Below you will find three type of technical assistance for the Subpart W XML reporting community: schema and XML requirements documentation, documentation addressing critical validation check, and XML reporting examples for each Subpart W Segment. These schema will go into effect in mid-February 2020; until then Version 10.0 of the schema remains applicable. While these will address a wide range of questions, users that continue to have difficulty configuring, uploading, or submitting their Subpart W XML are urged to contact the GHGRP Help desk by e-mail at GHGReporting@epa.gov.

Schema and XML Requirements

The Subpart W RY2019 XML reporting schema (version 10.0) only includes those data elements applicable to RY2019 reporting. EPA has limited this file to just those data elements applicable to 2019 to clarify requirements and to assist facilities in preparing their 2019 reports. To see the full XML schema for all subparts, all reporting years, and a change log comparing RY19 to RY18, please see the [XML Reporting Instructions](#) page.

- [Subpart W Schema v10.0](#) (11/21/2019) (828K) (year specific)
- [Subpart W Enumerations and Xpath Analysis](#) (xlsx, 11/21/2019) (58K)
- [Subpart W XML XPath and Associated Requirements Documentation](#) (xlsx, 11/21/2019) (270K)

An archive of RY2012, RY2013, RY2014, RY2015, RY2016, RY2017 and RY2018 XML reporting instructions can be found at [Archived XML Reporting Instructions](#).

Critical Validation Checks

Subpart W has almost 600 critical validations checks. To help XML reporters determine with specific data element is causing critical validation, we have provided that documentation below:

- [Subpart W Critical Validation Crosswalk](#)

XML Reporting Examples

This section provides examples of common Subpart W reporting scenarios and XML submissions demonstrating how annual GHG reports should be structured. In each case we have provided a complete segment report which includes all sources applicable to the segment. Each example is presented in a Reporting Form format and in an XML for consistent with the formats created by and expected by e-GGRT.

Segment	Example Files
Segment 1: Offshore Petroleum and Natural Gas Production	<ul style="list-style-type: none">• Segment 1 Populated Workbook• Segment 1 Populated XML
Segment 2: Onshore Petroleum and Natural Gas Production	<ul style="list-style-type: none">• Segment 2 Populated Workbook• Segment 2 Populated XML
Segment 3: Onshore Natural Gas Processing	<ul style="list-style-type: none">• Segment 3 Populated Workbook• Segment 3 Populated XML
Segment 4: Onshore Natural Gas Transmission Compression	<ul style="list-style-type: none">• Segment 4 Populated Workbook• Segment 4 Populated XML
Segment 5: Underground Natural Gas Storage	<ul style="list-style-type: none">• Segment 5 Populated Workbook• Segment 5 Populated XML
Segment 6: Liquefied Natural Gas (LNG) Storage	<ul style="list-style-type: none">• Segment 6 Populated Workbook• Segment 6 Populated XML
Segment 7: LNG Import and Export Terminals	<ul style="list-style-type: none">• Segment 7 Populated Workbook• Segment 7 Populated XML

Segment 8: Natural Gas Distribution	<ul style="list-style-type: none">• Segment 8 Populated Workbook• Segment 8 Populated XML
Segment 9: Onshore Petroleum and Natural Gas Gathering and Boosting	<ul style="list-style-type: none">• Segment 9 Populated Workbook• Segment 9 Populated XML
Segment 10: Onshore Natural Gas Transmission Pipeline	<ul style="list-style-type: none">• Segment 10 Populated Workbook• Segment 10 Populated XML
